

## Superfast Essex

### Essex Parish/Community Broadband Rollout Timeline

4 Oct 2013

v8.2

This table provides an indication of the expected dates for the delivery of superfast broadband infrastructure (24mbps+) and better broadband uplift (2-24mbps) in the parishes and communities across Greater Essex. The timeline for superfast broadband is between Apr 2014 to Mar 2016. Better broadband uplift will be deployed in Apr-Jun 2016, although these areas are currently being scoped for superfast broadband and improved timelines for delivery. The dates are indicative at this stage and are subject to change pending surveys, design and planning, and further change during implementation of the network. The areas with no dates at the lower-end of the table would not be affected by the project at this stage, either because those areas are served by commercial superfast broadband roll-out or currently served by better broadband. In the case of better broadband, Superfast Essex will scope these areas for superfast broadband as part of the drive to further increase coverage across Greater Essex.
